

Forest Plot: Stratified by Population Type

Natural colonies: 80.6% ($I^2=100\%$) | Restoration fragments: 72.7% ($I^2=86\%$)

Gray dashed: overall pooled (75.9%); Solid lines: stratified pooled estimates
Stratification reduces I^2 from 98.4% to 99.5% (natural) and 86.2% (fragments)
